- INDUSTRY-STANDARD PACKAGE
- SINGLE AND DUAL OUTPUTS
- INTERNAL INPUT AND OUTPUT FILTERING
- 24-PIN DIP PACKAGE
- BUILT-IN STANDOFFS

DESCRIPTION

The PWR11XX Series offers a broad line of low-cost, high-performance, unregulated, single and dual output DC/DC converters in a 24-pin DIP package. These miniature converters offer better performance and lower cost in industry-standard packages and pin-outs. The PWR11XX Series is internally filtered. No external parts are necessary.

Surface mounted components and Iso-ThermoFlex™

encapsulant allow for superior reliability, excellent thermal dissipation, and an extended temperature range of -25°C to $+85^{\circ}\text{C}$ at no extra cost.

The PWR11XX Series is ideal for use on high-density PC boards where isolated, unregulated, power is needed. Standoffs allow for PC board cleaning, helping preserve isolation. They also allow for visual inspection of solder joints.

APPLICATION NOTE

UNBALANCED LOADS

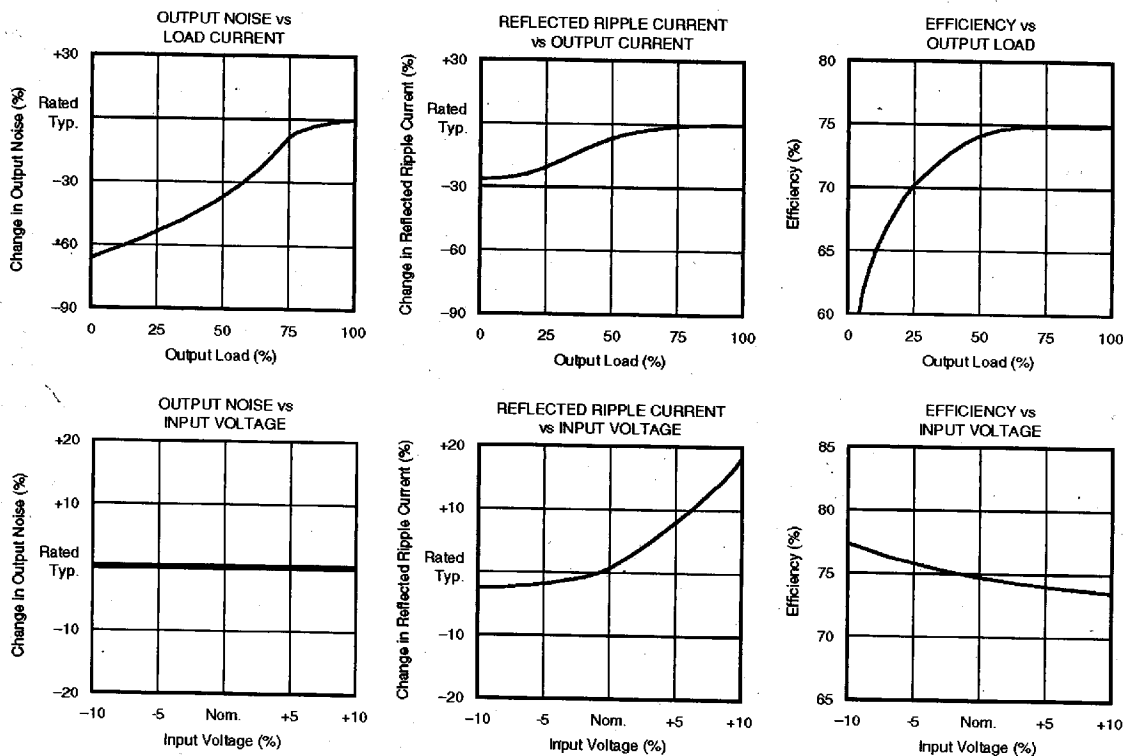

Unbalanced loads may be used on dual output models with either side providing up to its rated current. Output voltages, by design, will track each other in an unbalanced state within $\pm 10\%$ of one another.

OUTPUT NOISE

Output noise can be reduced to 30mVp-p, typically, by adding a 10 μ F tantalum capacitor with an equivalent series resistance (ESR) of less than 150m Ω at 10kHz across each output.

TYPICAL PERFORMANCE CURVES (CONT)
